SETS AI LEAD WATCHER (64-BIT WINDOWS)

DOCUMENT 2: HOW TO USE THE SOFTWARE (USER MANUAL)

Complete Guide to All 7 Application Tabs, Live LinkedIn Search & Municipal Building Permits

1. Launching the Application & Desktop Control Window

Double-click the 'SETS AI Lead Watcher' icon (with the SETS Logo) on your Windows Desktop, or run SETS_AI_Lead_Watcher_x64.exe. Two windows open automatically:

- 1. SETS Native 64-Bit Desktop Control Center: Shows live Watcher status, PostgreSQL connection health, total unique enquiries, duplicates blocked, and quick buttons to 'Open Full Dashboard GUI', 'Scan Internet Now', and 'Start Open-Source WhatsApp Bridge (+918138858961)'.
- 2. Full Interactive SETS AI Lead Watcher Dashboard Window: Contains 7 navigation tabs across the top bar for managing leads, searching LinkedIn live, tracking municipal building permits, searching historical records, and configuring team contacts.

2. Tab 1: Live Enquiries & LinkedIn Search

This is your main real-time intelligence command center for www.sets4us.com activities (Energy Audit, Sustainability Audit, BMS, CMS, ESG Reporting) across UAE, KSA, and India.

A. Top KPI Summary Cards

- **Total Unique Enquiries: Total deduplicated leads stored in your database.**
- High-Intent RFPs & Leads: Enquiries scoring >= 75% AI relevance (RFPs, tenders, direct consultant searches).
- Leads with Point of Contact: Enquiries where the AI extracted a Contact Name, Email, or Phone/WhatsApp number.
- Duplicates / Similar Blocked: Count of reposted or similar enquiries automatically blocked by the Semantic Anti-Duplication Engine.

B. Live On-Demand LinkedIn Server & Internet Requirement Search Box

Located directly below the KPI cards (highlighted in emerald). Use this whenever you want to search LinkedIn and the Internet live for a specific requirement:

- How to Use: 1) Type any keyword (e.g. 'BMS tender Dubai', 'ASHRAE Audit Riyadh', 'ESG consultant Mumbai', 'Energy Audit Kochi'). 2) Choose the target Region (UAE, KSA, or India) and Service Category. 3) Click 'Fetch Live LinkedIn & Web Results'.
- What Happens: The engine queries LinkedIn's Guest Search API, LinkedIn Posts/Pulse indexers, Google News RSS, Bing RSS, DuckDuckGo, and Reddit in real time, runs AI qualification & anti-duplication, saves new leads, and refreshes the feed.

C. Working with Lead Cards

- Filter Pills & Dropdowns: Click any service pill (Energy Audit, Sustainability Audit, BMS, CMS, ESG Reporting) or filter by Region (UAE, KSA, India), Platform (LinkedIn, Web / Tenders, Reddit), or Status.
- Extracted Point of Contact (POC): Displays Contact Name, Role, Company, Location, clickable Email, and clickable Phone/WhatsApp link.
- Suggested SETS Outreach Pitch: Click 'Copy Pitch' to copy a ready-to-send sales message tailored to the enquiry.
- One-Click Alert Buttons: Click 'WhatsApp Alert to Team' (sends via automated bridge), 'Send to +918138858961 (WA Web)' (opens WhatsApp directly with pre-filled lead summary), or 'Email Alert to Team'.

3. Tab 2: New Buildings (UAE & India Permits)

Tracks newly approved Building Permits, Green Building filings, RERA registrations, MoEFCC PARIVESH environmental clearances, and upcoming industrial/commercial projects across UAE and India.

A. Covered Municipalities & State Corporations

- UAE Municipalities: Dubai Municipality (DM / Trakhees / Al Sa'fat), Abu Dhabi DMT (MePS / DARI / KEZAD / Estidama), Sharjah Municipality, Ajman Municipality (AMPD), and Ras Al Khaimah (RAK Municipality Barjeel & RAKEZ).
- Indian State Corporations: Mumbai BMC / PMC Pune / MahaRERA / MIDC (Maharashtra), Bengaluru BBMP / KIADB (Karnataka), Kochi K-SMART / K-RERA (Kerala), Chennai GCC / CMDA / SIPCOT (Tamil Nadu), Hyderabad GHMC / TS-bPASS (Telangana), Delhi NCR / Noida / Gurugram, Ahmedabad AMC / GIDC (Gujarat), and All-India MoEFCC PARIVESH.

B. Key Details Shown on Every Building Permit Card

- Permit No. & Date: Official or indexed permit reference number, approval status, and application/permit date.
- ProjectStakeholders: 1) Client / Developer / Owner Name, 2) Engineering / MEP / Lead Consultant Name, and 3) Main / MEP Contractor Name.
- Client & Project Contact Details: Contact Person, Email Address, Phone/WhatsApp number, and project location.
- Actions: Click 'Scan UAE & India Municipalities Now' to fetch new projects, '+ Add Building Permit' to log a permit manually, 'Export Permits to CSV' to download an Excel/CSV report, or 'Send Project to +918138858961 (WhatsApp)'.

4. Tab 3: Search Previous Enquiries (DB)

Allows you to search and audit your entire historical PostgreSQL database of past enquiries at any time:

- Multi-Criteria Search: Filter by Keyword/Company/POC Name/Phone/Email, Service Activity, Region (UAE, KSA, India), Source Platform, From Date, To Date, Minimum AI Score, and POC Availability.
- CSV Export: Click 'Export Results to CSV' to download all matching historical enquiries into a spreadsheet.

5. Tab 4: Team Numbers & Emails Config

Manage all phone numbers and email addresses that receive automated alerts from the AI Watcher:

- Pre-Configured Number: Your Indian WhatsApp number (+918138858961) is pre-loaded and active by default.
- Add a New Number or Email: Enter Team Member Name, Role, WhatsApp Number (with country code, e.g. +91... or +971...), Email Address, and Region Filter (All Regions, India Only, UAE Only, or KSA Only), then click 'Save Contact to Database'.
- Edit, Test, or Delete: Use 'Edit' to modify any existing number/email, 'Test WA' / 'Test Email' to send a verification alert to that specific person, or 'Delete' to remove them.

6. Tab 5: Live AI Enquiry Analyzer

A sandbox where you can paste any LinkedIn post, tender notice, or WhatsApp message to test how the SETS AI Engine scores it:

- Anti-Duplication Verification: Checks if a similar enquiry already exists in your database and displays a warning banner if it is a duplicate.
- POC & Pitch Extraction: Extracts Contact Name, Role, Organization, Email, Phone, and

generates a custom SETS sales pitch.

7. Tab 6: PostgreSQL, LinkedIn & WhatsApp Settings

- Free PostgreSQL Configuration: Enter your Neon.tech, Supabase, or Local PostgreSQL URI and click 'Test & Connect PostgreSQL'.
- Open-Source WhatsApp Configuration: Select between SETS Open-Source Local Bridge (Baileys), WAHA, CallMeBot, Meta Cloud API, or Twilio, and click 'Send Test WhatsApp to +918138858961'.
- Direct LinkedIn Server Cookie & Gemini Key: Optionally paste your LinkedIn 'li_at' session cookie for authenticated LinkedIn searches and your Google Gemini API key. All secrets are encrypted with Windows 64-Bit DPAPI.
- Anti-Duplication Threshold: Adjust the similarity cutoff (default 0.62 = blocks enquiries that are >= 62% similar to existing database records).

8. Tab 7: Scan & Alert Logs

- Recent Internet Scan Runs: Shows every scheduled and manual scan, how many posts were found, how many duplicates were blocked, and how many new unique leads were saved.
- Notification Dispatch Audit Log: Shows the delivery status and timestamp of every WhatsApp and Email alert sent to your team.
