SETS AI LEAD WATCHER (64-BIT WINDOWS)

DOCUMENT 1: HOW TO INSTALL THE SOFTWARE (64-BIT WINDOWS)

Step-by-Step Installation, PostgreSQL Database & Open-Source WhatsApp Bridge Setup Guide

1. Overview & System Requirements

The SETS AI Lead Watcher (www.sets4us.com) is packaged as a self-contained 64-Bit Windows application. Colleagues and team members do NOT need to install Python or manually configure code to run the software.

- **Supported Operating System: Windows 10 or Windows 11 (64-Bit / x64 Architecture).**
- Installer File to Share with Colleagues: SETS_AI_Watcher_Setup_x64.exe (located in D:\PYTHON\MARKET).
- Standalone Executable File: SETS_AI_Lead_Watcher_x64.exe (can also be run directly without installation).
- Optional for Automated Local WhatsApp Bridge: Node.js (64-Bit) if using the free self-hosted Baileys WhatsApp bridge on port 3001.

2. Step-by-Step Installation Using SETS_AI_Watcher_Setup_x64.exe

Double-click SETS_AI_Watcher_Setup_x64.exe on any 64-Bit Windows PC to launch the interactive 4-step Setup Wizard:

Step 1 of 4: Welcome & 64-Bit Windows OS Verification

- OS & Security Check: The wizard automatically verifies that your PC is running 64-Bit Windows and confirms that Windows DPAPI Credential Encryption is active.
- Destination Folder: Accept the default installation path (C:\Users\<YourName>\AppData\Local\Programs\SETS_AI_Lead_Watcher) or click 'Browse...' to select a custom folder, then click 'Next: Frameworks & Database ->'.

Step 2 of 4: Frameworks, PostgreSQL Database & Desktop Icon Selection

- Option A - Use Cloud or Existing PostgreSQL URI (Recommended for Team Sharing): Select 'Use Free Cloud PostgreSQL (Neon.tech / Supabase) or Existing Local PostgreSQL URI' and enter your connection string. If you leave the default URL and do not have a PostgreSQL server running yet, the app automatically uses its built-in local SQL cache so it works immediately!
- Option B - Auto-Install Local PostgreSQL 16 (64-Bit): Select 'Download & Install PostgreSQL 16 (64-Bit) Automatically via Windows Package Manager (winget)' to have the installer silently install PostgreSQL 16 on the PC.
- Shortcuts & WhatsApp Framework: Keep 'Create Desktop Shortcut with SETS Logo Icon' and 'Install Open-Source Free WhatsApp Bridge Framework (+918138858961)' checked, then click 'Install Now (Step-by-Step) ->'.

Step 3 of 4: Automated Step-by-Step Component Installation

Watch the progress bar and live console log as the wizard executes all 6 installation stages:

```
[Step 1/6] Verifying 64-Bit Windows OS & creating target directories...
[Step 2/6] Installing SETS_AI_Lead_Watcher_x64.exe & SETS Logo Icon...
[Step 3/6] Configuring PostgreSQL Database & DPAPI Security Store...
[Step 4/6] Setting up Open-Source WhatsApp Bridge (+918138858961)...
[Step 5/6] Creating Desktop Icon ('SETS AI Lead Watcher') with SETS Logo...
[Step 6/6] Installation & Security Verification Complete!
```

Step 4 of 4: Finish & Launch Application GUI

- Auto-Launch: Keep 'Launch SETS AI Lead Watcher GUI Immediately' checked and click

'Finish & Launch SETS AI Lead Watcher'. Both the SETS Native Desktop Control Window and the Full Interactive Dashboard GUI will open automatically.

3. Setting Up a Free Shared PostgreSQL Database (Optional)

If you want all colleagues to share a single live central database of enquiries and building permits for free:

- Step 1: Create a free account at https://neon.tech or https://supabase.com (both offer free forever PostgreSQL tiers).
- Step 2: Copy your PostgreSQL Connection URI (e.g. postgresql://user:pass@ep-xyz.ap-southeast-1.aws.neon.tech/neondb?sslmode=require).
- Step 3: Open the SETS AI Lead Watcher app -> go to the 'PostgreSQL, LinkedIn & WhatsApp Settings' tab -> paste the URI into 'PostgreSQL Connection URI' -> click 'Test & Connect PostgreSQL' -> click 'Save All Settings'.

4. Setting Up the Free Open-Source WhatsApp Bridge (+918138858961)

Your Indian WhatsApp number (+918138858961) is pre-configured by default. To enable 100% free automated background WhatsApp messages from your PC:

- Step 1: Double-click 'start_whatsapp_bridge.bat' in the installation folder (or click the green 'Start Open-Source WhatsApp Bridge (+918138858961)' button in the SETS Desktop Control Center window).
- **Step 2: A browser tab will open at http://127.0.0.1:3001 displaying a QR Code.**
- Step 3: On your phone, open WhatsApp -> Settings -> Linked Devices -> Link a Device, and scan the QR code on screen.
- Step 4: Once linked, the status badge turns green ('CONNECTED & READY') and the AI Watcher will automatically send all high-priority lead alerts to +918138858961 and all active numbers in your Team Contacts tab!

5. Security Features Built Into the Installation

- Windows 64-Bit DPAPI & Android AES-256 Encryption: All API keys, database passwords, LinkedIn cookies, and SMTP passwords are encrypted at rest using Windows CryptProtectData (DPAPI) on PC and AES-256 Vault on Android.
- Localhost Isolation, FLAG_SECURE & CSP: Binds strictly to 127.0.0.1 on PC, blocks spyware screen recording via Android FLAG_SECURE on phones, and enforces Content-Security-Policy (CSP), PIN Lockout, and rate limiting.

6. Installing the Android Phone Application (.APK)

You can also install the application on any Android smartphone or tablet using SETS_AI_Lead_Watcher_Android.apk:

- Step 1 - Transfer the APK: Send SETS_AI_Lead_Watcher_Android.apk (located in D:\PYTHON\MARKET) to your Android phone via WhatsApp, Email, Google Drive, or USB cable.
- Step 2 - Tap to Install: Tap SETS_AI_Lead_Watcher_Android.apk on your phone. If prompted by Android, allow 'Install from this source' and tap 'Install'.
- Step 3 - Launch from Home Screen: Tap the 'SETS AI Watcher' icon (with the SETS Shield Logo) on your Android phone. It runs 100% autonomously on your phone and can also sync with your PC/PostgreSQL server.
