SETS AI LEAD WATCHER (64-BIT WINDOWS)

DOCUMENT 2: HOW TO USE THE SOFTWARE (USER MANUAL)

Complete Guide to Multi-User Profiles, Search Areas, API Plans, LinkedIn & Building Permits

1. Multi-User Profile Vault & Session Persistence

SETS AI Lead Watcher is built for multi-user enterprise teams with complete data isolation:

- User Profile Header: Look at the top-right corner of the dashboard to see the active user badge (e.g. ' Alex' or ' Engineer_1'). Click it at any time to open the Profile Vault modal.
- Creating / Switching Profiles: Enter a new username to create a clean-slate profile, or select an existing colleague from the dropdown to switch instantly.
- Data Persistence: All configured municipal search areas, custom keywords, team contacts, and tender inquiries are saved to that specific user and automatically restored whenever they launch the application.

2. Tab 1: Live Enquiries & LinkedIn Server Search

Your real-time intelligence feed for www.sets4us.com services (Energy Audit, BMS, CMS, Sustainability Audit, ESG Reporting) across UAE, KSA, and India.

- Live On-Demand Search Bar: Type any requirement keyword (e.g. 'BMS tender Dubai', 'ASHRAE Audit Riyadh', 'ESG consultant Mumbai') and click 'Fetch Live LinkedIn & Web Results'.
- Direct WhatsApp Alerting: Click ' Send to WhatsApp' to instantly open a pre-formatted lead brief addressed to your profile's configured team WhatsApp recipient.
- Point of Contact Extraction: Displays Contact Name, Role, Organization, Location, verified Email, and clickable Phone/WhatsApp call buttons.
- Tailored Sales Pitch: Click '[*] Copy Pitch' to get an AI-crafted proposal message referencing SETS capabilities ready to send to the client.

3. Tab 2: New Buildings & User-Configurable Search Areas

Tracks newly approved building permits, MEP tenders, and industrial projects across UAE and Indian municipal corporations.

A. User-Configurable Municipal Search Areas

- Configuring Your Own Areas: Click '+ Add Custom Search Area' to monitor specific cities, states, or municipal corporations (e.g. 'Pune Municipal Corporation (PMC)', 'Bangalore BBMP', 'Sharjah SEWA', 'Riyadh Mun').
- Keyword Targeting: Assign target keywords (e.g. 'MEP, BMS, Energy Audit, Chiller, High-Rise') and portal URLs per area.
- Active / Pause Toggles: Toggle any search area on or off with a single click. Each user configures their own independent search areas.

B. Building Permit Details & Stakeholders

- Stakeholders Identified: Every permit card identifies: 1) Client / Developer, 2) Engineering / MEP Consultant, and 3) Main / MEP Contractor.
- Direct Contact Information: Point-of-contact name, email, phone number, and official municipal portal verification links.

4. Tab 3: Search Previous Enquiries (Historical Database)

Search and audit your entire historical database of past inquiries with multi-criteria filtering:

- Filters: Filter by Keyword, POC Name/Phone/Email, Service Category, Region, Date

Range, and AI Relevance Score.

- CSV / Excel Export: Click ' Export Results to CSV' to download a complete spreadsheet of matching records.

5. Tab 4: Team Numbers & Emails Configuration

Manage team members who receive automated alerts. Starts with zero preloaded entries for a clean slate:

- Anti-Duplication Protection: The system automatically prevents duplicate entries by verifying Name, Phone, and Email against existing team records.
- Region Filters: Assign recipients to receive alerts for 'All Regions', 'UAE Only', 'KSA Only', or 'India Only'.
- Test Dispatch: Click 'Test WA' or 'Test Email' to verify message delivery to any individual team member.

6. Tab 5: Portal Login & API Access Plan

Points out the specific logins, cookies, and APIs required to access restricted portals, with step-by-step instructions:

- 1. Direct LinkedIn Session (li_at Cookie): Why required: LinkedIn restricts guest searches. Access plan: Log in to linkedin.com in your browser -> Press F12 -> Application -> Cookies -> Copy 'li_at' cookie value -> Paste in the form. Encrypted per user.
- 2. Google Gemini AI API: Why required: Parses web notices and extracts contact info using AI. Access plan: Visit aistudio.google.com to generate a free API key (free tier includes 15 RPM).
- 3. Google Custom Search (CSE): Why required: Indexes municipal tender announcements and gazettes. Access plan: Create a free Google Cloud API key and Custom Search Engine ID (100 queries/day free).
- 4. Municipal Portals & UAE PASS: Why required: Public registers (Dubai DM, Abu Dhabi MePS, K-SMART, TS-bPASS) work directly. For detailed architectural packages, enter your UAE PASS or municipal SSO ID.

7. Tab 6: PostgreSQL & Notification Settings

- PostgreSQL Connection: Enter your local or cloud PostgreSQL URI, test connectivity, and sync databases.
- WhatsApp Provider: Select between SETS Free Local Bridge (Baileys), WAHA, CallMeBot, Meta Cloud API, or Twilio.
- Anti-Duplication Threshold: Adjust similarity cutoff (default 0.62) to prevent reposted inquiries.

8. Tab 7: Security Shield & Mobile Sync

- Security Safeguards: Windows DPAPI encryption, Android FLAG_SECURE screenshot blocker, 4-digit PIN lock, brute force lockout, and isolated sandboxing.
- Android APK Parity: The Android APK provides 100% feature parity with the PC application, tailored for phone touch screens.
